Swap farming surprises for solid strategies

With Xero and Figured
A perfect partnership

Born in the cloud, Xero is a beautiful, easy-to-use accounting platform for small businesses. Figured is an online farm financial management software that works hand-in-hand with Xero. Together they offer budgeting and long term planning for livestock, dairy, and arable crop production.

As your advisors

We can help you:

- Improve business performance to help develop a clear, strong plan for a sustainable future using knowledge of your current operation and financial performance.
- Understand how changes in production affect farm finances by reconciling stock movements, arable crop tracking, and recording milk production.
- Build budgets more efficiently and quickly report variances to Xero financial data.

In farming, anything can happen

With so many moving parts – along with changes in legislation, climate change and the uncertainty of Brexit – you have enough on your plate. Let us help you manoeuvre to a successful future.

“I can have strategic conversations with my accountant based on up-to-date information. We talk less but we talk better.”

William Notcutt, William Notcutt Estates
